Homes up to 230m²

BuiltRight.
From the start

With over 120 new designs and a commitment to design, management and client excellence, **Morcraft Homes** will be the choice you'll be proud of.

MORCRAFT
HOMES
BUILT RIGHT. FROM THE START

BuiltRight.

From the start

Director Steve Morcombe has over 30 years home building experience in Queensland and has a thirst for doing it right. Steve believes if you're going to do something you should do it 'right from the start', which is reinforced in Morcraft Homes' slogan, "Built Right, From The Start".

Over the past 20 years he has sold over 1600 new homes making us one of the largest locally owned new home builders on the Sunshine Coast.

With this track record we can ensure all our customers peace of mind in dealing with a financially viable and secure builder with an excellent reputation.

We have won two excellence in business awards and over 50 local and state industry awards for display homes, custom homes, spec homes, small lot homes plus best bathroom which is reflected in the diversity of design and products showcased in the new Morcraft Homes display homes.

Morcraft Homes has over 120 brand new designs ranging from 131m² to 551m² with more being developed to become part of their Designer Range of homes.

One of the key reasons for our success is our ongoing design improvement, but also the company's ability to build what people want with full design flexibility to build one off designs.

Morcraft Homes is backed by a dedicated team of long term staff, subcontracted tradespeople and long term supplier relationships which span 20 years.

Talk to one of our friendly Sales Consultants at one of our display centres and let your dream home become a reality with Morcraft Homes – Built Right. From The Start.

BERMUDA 225

225.31m² • 24.5sq

The **Bermuda 225** is perfect for those corner blocks that are not too deep. The courtyard can be filled in to make a 4th bedroom. The massive alfresco can be enclosed to provide a private courtyard. A perfect design for those corner blocks with a view to the front.

FLORIDA 225

224.88m² · 24.2sq

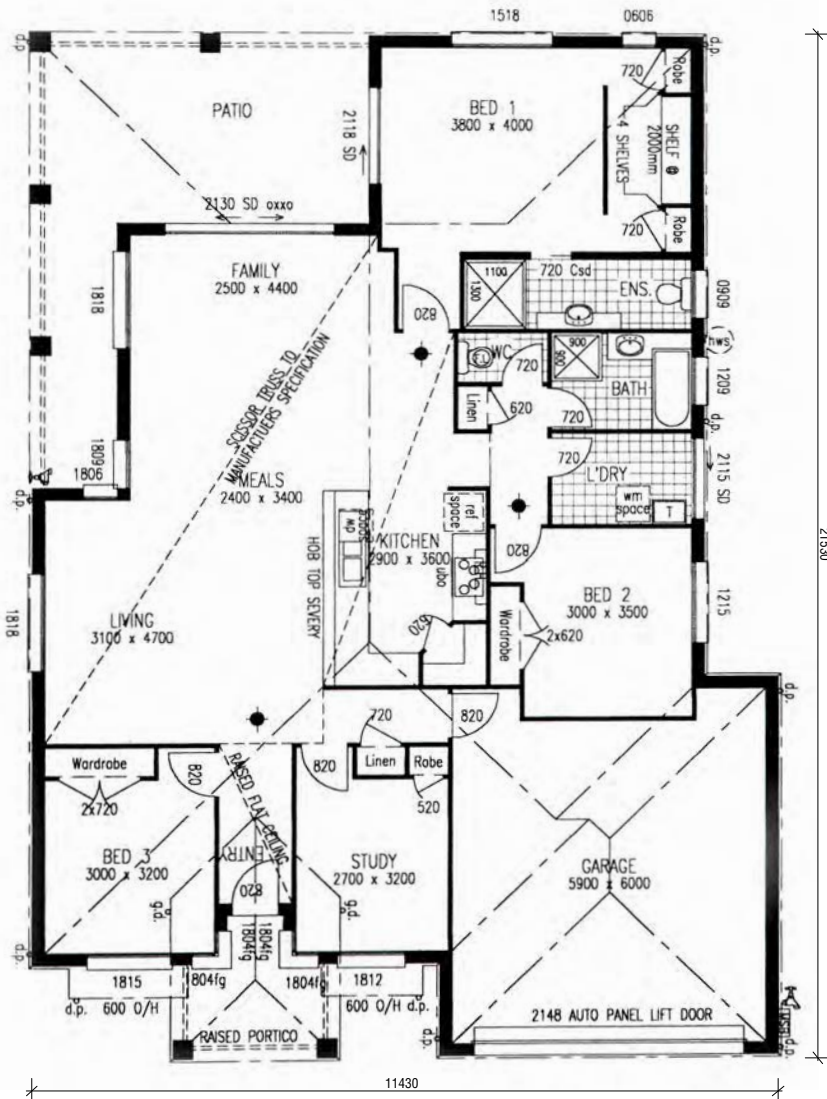

With a raised patio and raised ceiling to entry, leading to a raked ceiling over the entire living areas, this design is impressive. Also with a 4th bedroom option and huge patio under roof areas, it's a must to see.

“I would not build a new home on the Sunshine Coast without these features and benefits.”

BuiltRight.
From the start

① Conventional steel reinforced footing and slab engineered design to suit your individual block. No shortcuts, footing/slab construction that has a pedigree in standing the test of time and controlling the soil stability underneath it, means fewer problems, long lasting durability and very reliable – A BIG RELIEF.

② All our brickwork, rendered or not, runs to the concrete footing, no ugly exposed concrete edging. We found it eliminates most rising damp, stands up to elements, looks fabulous.

③ Termite treatment to “whole of house” to Australian Standards 3660-1. All pipes that penetrate through your slab are collar protected and every external house and external post has a fully retreatable, hidden, safe to kids, Termguard Pest Reticulation system to keep termites out of your hard earned new home. Warranty on system 50 years.

④ Full termite treated wall frames and roof trusses with the stamp of H2 or T2, proof your homes structural integrity is protected 24 hours, 7 days a week. All of our external walls are wrapped in sisalation, protection against damp and the elements.

Where your money goes!

⑤ 12mm thick zinc coated cyclone rods beside all openings and at 1200 centres to the perimeter wall frame of your home. Not compulsory to use but every Morcraft Home is built with security, longevity and extra strength in mind, more protection for you.

⑥ Purpose designed wall ‘HardiBrace’ to strengthen and stiffen up your home against the storms and high winds of the Coast. Every home is built to ‘N3’ (41 metres per second every second) or Wind Loading W4 in the old language. W4 strength is added to our frames, trusses, windows and tie down of your roof to beat off the harsh storms and elements – more security.

⑦ How do you make your plaster ceilings last longer, not fall in, not crack, not get peaks and shadows with no nail or screw head cracks? Simple, use metal ceiling battens, it is the only way to comply with Australian Standards for a domestic ceiling and to eliminate ceiling issues. You can save by not having them but you run the risk of meeting the plasterer and painter to fix issues after you move into your home.

⑧ Every Morcraft Home has its roof fixed to suit the high wind category ‘N3’ and has the blue/silver heavy duty sarking under to catch any condensation and to prevent leaks. It also has some thermal value, more reason to ensure your new home is built better, when you move in, what a relief.
